EDUCATION

Sushant University

B.Tech, Computer Science Engineering (AI & ML); Minor in Artificial Intelligence

Relevant coursework: Deep Learning, NLP, Predictive Modeling, Data Structures & Algorithms

Gurgaon, India | 2022 - May 2026

Queen's University

Computer Science coursework toward BSc (studies discontinued)

Kingston, ON | 2019 - 2021

Scottish High International School

CBSE Class XII: 90% (2019) | Class X: 93% (2017) | Honour Roll (2015-2019)

Gurgaon, India

LEADERSHIP & SERVICE

- Scottish High (2016-2019): Founded Engineering Club; organized inter-school MUNs (30+ schools), hackathons, and science quizzes; Intl. Olympiads (Math & Science); Sports Captain.
- BFW School for the Blind: led fundraising and audiobook conversion for visually impaired students. QHacks 2020: registration and Microsoft workshop support.

EXPERIENCE

SKIC Pvt. Ltd.

Part-time Systems Developer & Operations Analyst

Gurgaon, India | Jan 2025 - Present

- Deployed EPCDash in production across multiple EPC construction projects; reduced manual reporting by ~2-3 hours/day and decreased quantity, labour, and billing errors.
- Gathered requirements from project managers and site teams; translated Excel/WhatsApp field workflows into structured, automated reporting pipelines.

upGrad x Uber (MentorMind)

Mentor-Led Data Science Program | Certified by upGrad Education Pvt. Ltd.

Remote | Jun 2024 - Jul 2024

- Built a capstone model to forecast hourly traffic volumes at road junctions using feature engineering, visualization, and predictive modeling on historical traffic data.

Cipla

Business Intelligence Analyst

India | Jun 2021 - Aug 2021

- Produced SQL-driven KPI dashboards and recurring reports for pharmaceutical business stakeholders; validated data quality and documented reporting logic.

PROJECTS

EPCDash - Enterprise EPC Project Command Center

Python, FastAPI, Next.js, LangGraph, Google Gemini, SQLite, Railway

github.com/hansitvarshney/EPCDash | Live demo on Railway

Jun 2026

- Built a full-stack EPC command center bridging on-site engineering schedules and client billing tranches with decoupled progress vs. payment-milestone data models.
- Orchestrated a LangGraph multi-agent pipeline for multimodal site-data ingestion (Gemini Flash), Pydantic validation, and dynamic Excel integration; deployed for live use at SKIC Pvt. Ltd.

LLMOps Gateway & Observability Platform

Python, FastAPI, Redis, Qdrant, PostgreSQL, OpenTelemetry, Docker, arq

github.com/hansitvarshney/llmops-gateway

Jul 2026

- Engineered an async multi-tenant LLM proxy with OpenAI/Anthropic adapters, dual-layer caching (Redis + Qdrant semantic), circuit breakers, and cross-provider failover routing.
- Shipped multi-tenant API-key auth, per-tenant rate limiting, Postgres trace persistence, and background workers; 127+ unit tests, Dockerized production stack.

AEVAR - GraphRAG Financial Audit Pipeline

Python, Neo4j, Pydantic, Google Gemini, Streamlit

github.com/hansitvarshney/AEVAR | Streamlit demo live

Jun 2026

- Built Pydantic-gated invoice ingestion with quarantine routing; implemented Neo4j GraphRAG for vendor/contract context on flagged transactions.
- Deployed schema-constrained Gemini agent producing typed executive risk briefings (fraud exposure, risk score, remediation actions).

Academic ML Portfolio

- IMDB Sentiment (GRU), Face CNN (LFW), Credit Card Fraud (Isolation Forest), Fashion MNIST (~88%).

Coursework

TECHNICAL SKILLS

Languages: Python, Java, SQL, TypeScript

ML & AI: TensorFlow, Keras, Scikit-learn, Pandas, NumPy, LangGraph, RAG, GraphRAG, Gemini, OpenAI

Backend & Data: FastAPI, SQLAlchemy, Redis, PostgreSQL, Neo4j, Qdrant, Docker, OpenTelemetry, pytest

Frontend: Next.js, React, Tailwind CSS, Streamlit
